Soothe the itch

The latest products on the market

Soothe the **itch!**

Sweet Itch is one of the most frustrating conditions for horses and their owners, and it can be very difficult to treat.

Sweet Itch is an allergic reaction to the saliva of biting midges which results in intense irritation, particularly around the mane and tail. Prevention and treatment is paramount so take a look at these products that can help.

Itchnomore

Itchnomore is effective for horses and ponies prone to itching and it can be applied directly to one area or diluted to create a soothing all over wash. Itchnomore soothes irritation, reduces scurfy skin and encourages healthy hair condition. Apply every other day for maximum benefit.

Available from stockists or for more information visit www.equine-america.co.uk

Dermoline Sweet Itch Lotion

A soothing protective insecticidal lotion to alleviate and prevent sweet itch. A highly effective licensed veterinary medicinal product for use during the summer season.
