Itchnomore

Horse or Pony prone to itching? For effective relief in mane and tail area, backs of legs and belly. Repeat every three days, wash out or remove with small amount of cooking oil.

Contact: www.equine-america.co.uk or call 01403 255809

£14.99 for 300gms

The Cavalesse combi-pack

An innovative range of skincare products to help maintain and support healthy skin in horses prone to summer skin allergies, often caused by reactions to bites from Culicoides midges. In the form of a natural food supplement taken monthly in water, the supplement helps reduce histamine release, stimulating immune response and reducing anti-inflammatory reactions. Used with a skincare gel that can be applied to the irritated skin area to help support natural immunity. The combi-pack includes three 20g sachets of Cavalesse Oral and a 60g tube of Cavalesse Topical, which will last for approximately three months. Contact: Your vet or Or Janssen Animal Health on 01494 567555

£80 - £95

No Flies on us!!!

Although it is still cold, it should be the time of year when we look at keeping those pesky flies at bay. Here are a few products currently on the market to help ease the situation.

Insect Guard Premises Spray

One application will last up to 45 days to protect stables/shelters from flying and crawling insects.
