

A NEW CONCEPT

EU Patent Pending

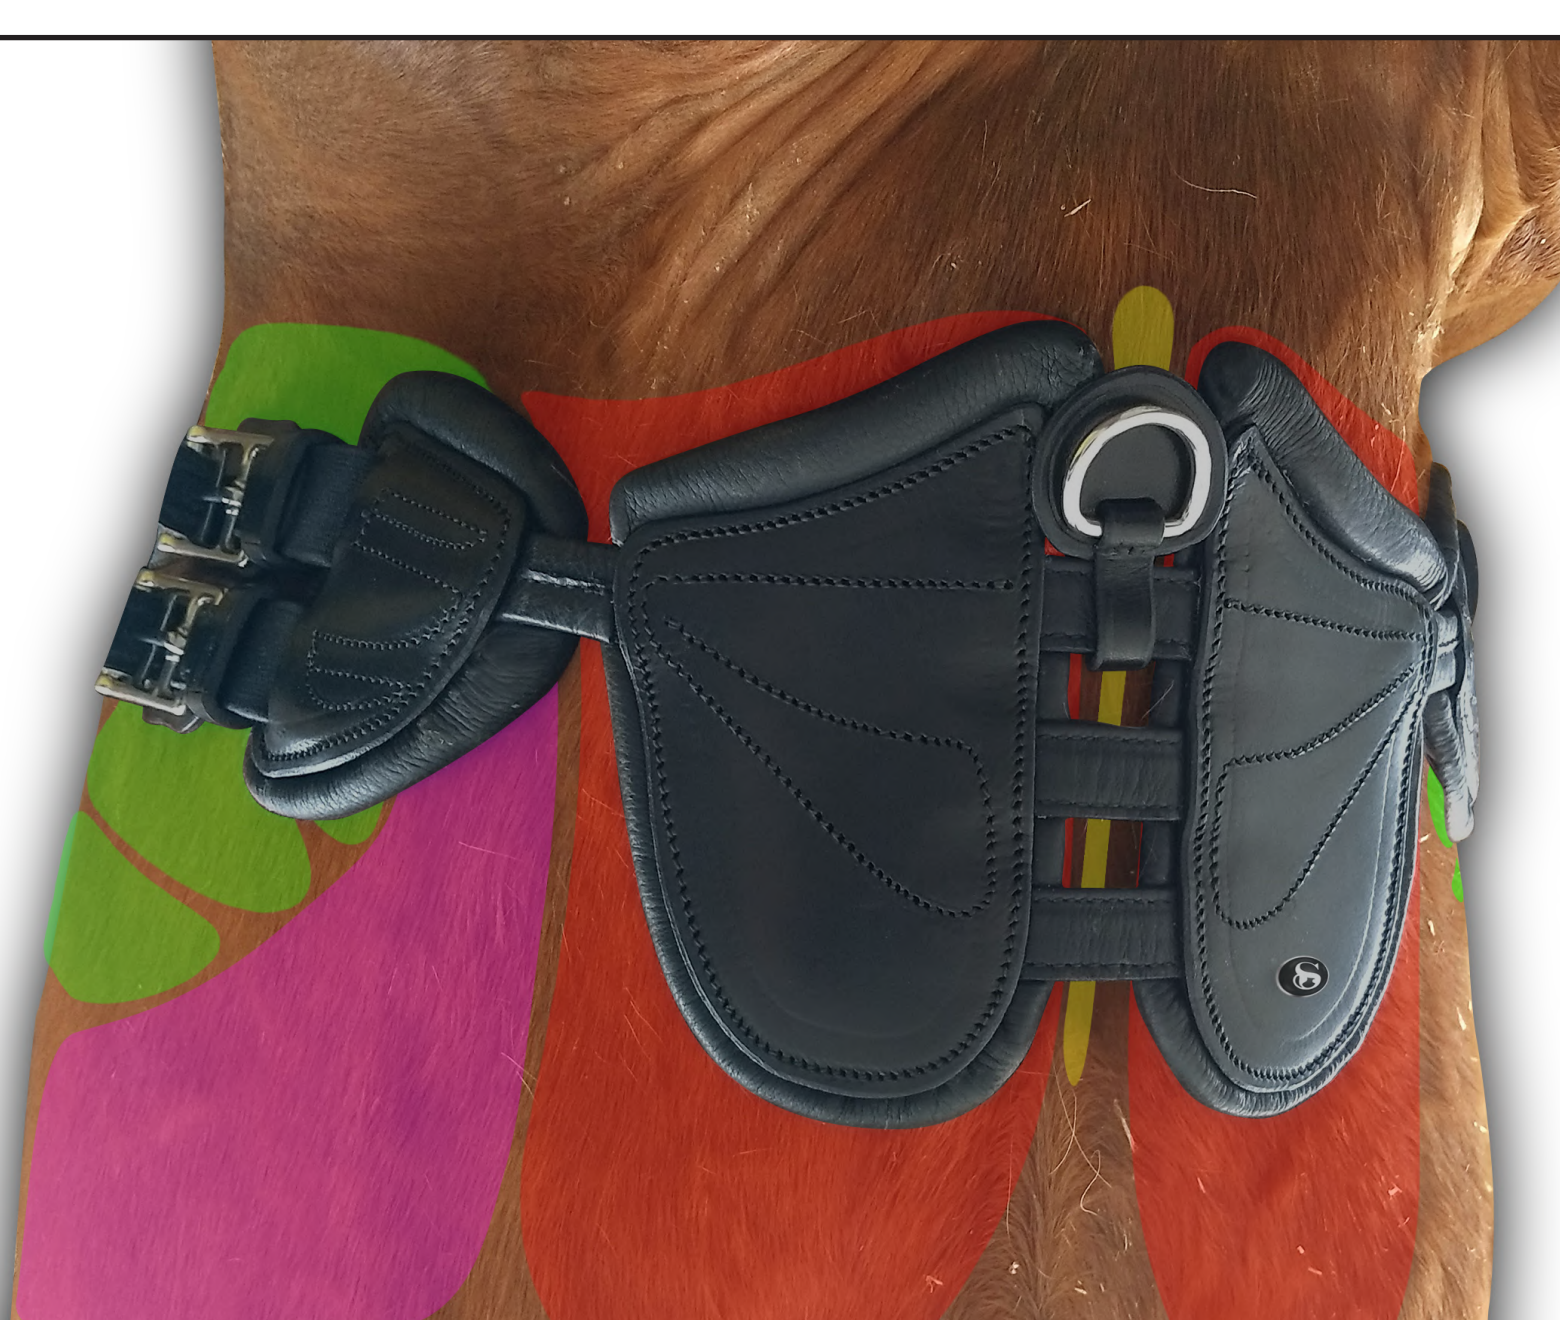

FREEDOM GIRTH

FREE YOUR HORSE

- Sternum.
- Externals intercostals.
- Pectoralis ascendens.
- Oblique abdominis externus.

The unique Freedom Girth, was designed to ensure that each part of the girth works in unison with a particular muscle of the chest, without interfering with the freedom of other muscle functions.

Independent support of the intercostals muscles, both right and left.

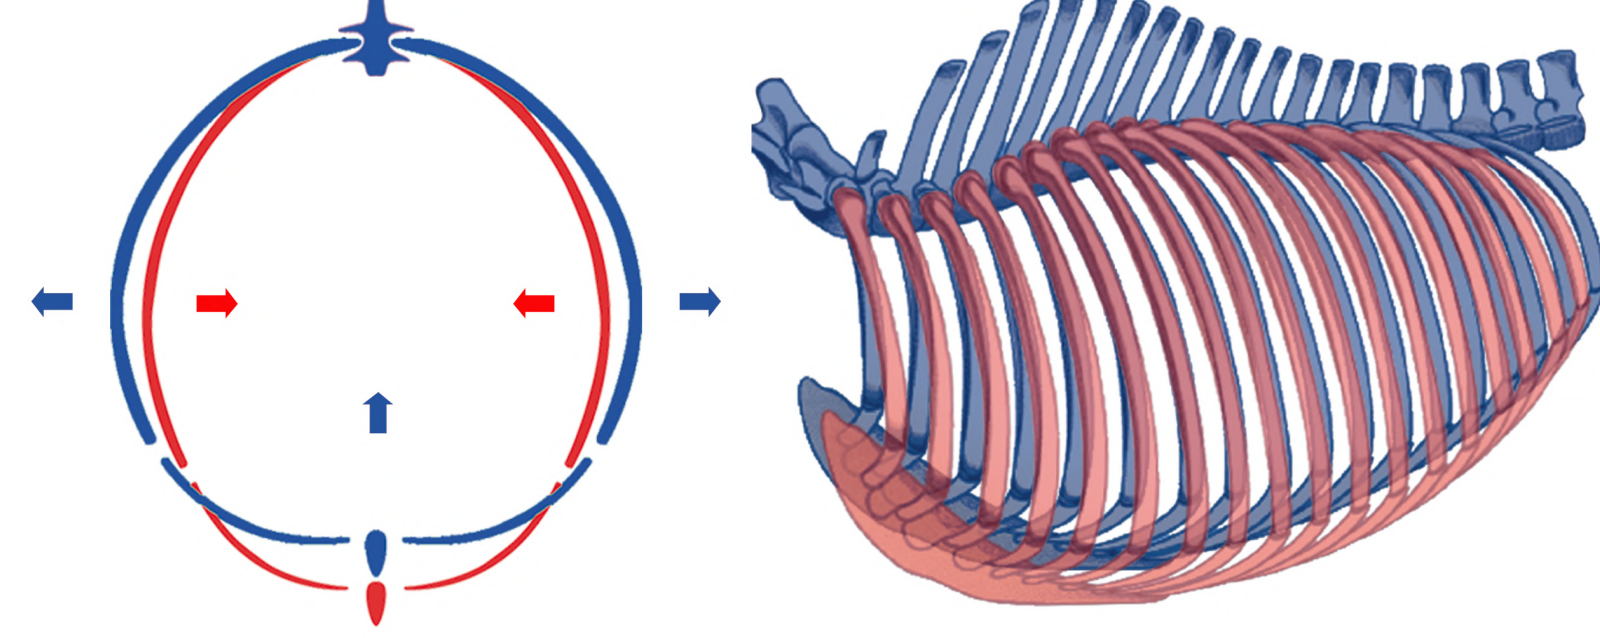

Independent support of the pectoral muscles, both upward and oblique.

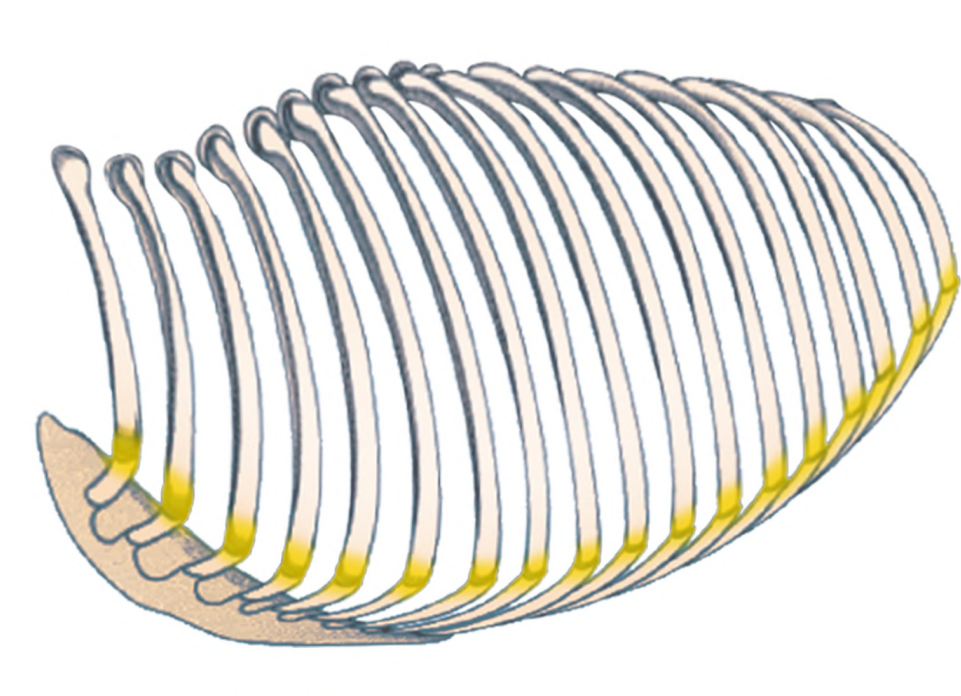

Independent support of the pectoral muscles, as the muscles move and change shape.

MECHANICAL MOVEMENT PERFORMED BY THE RIB CAGE WHEN THE HORSE BREATHES

The elasticity of the cartilaginuous junction of the intercostals provides movement of the rib cage allowing unforced expansion and contraction.

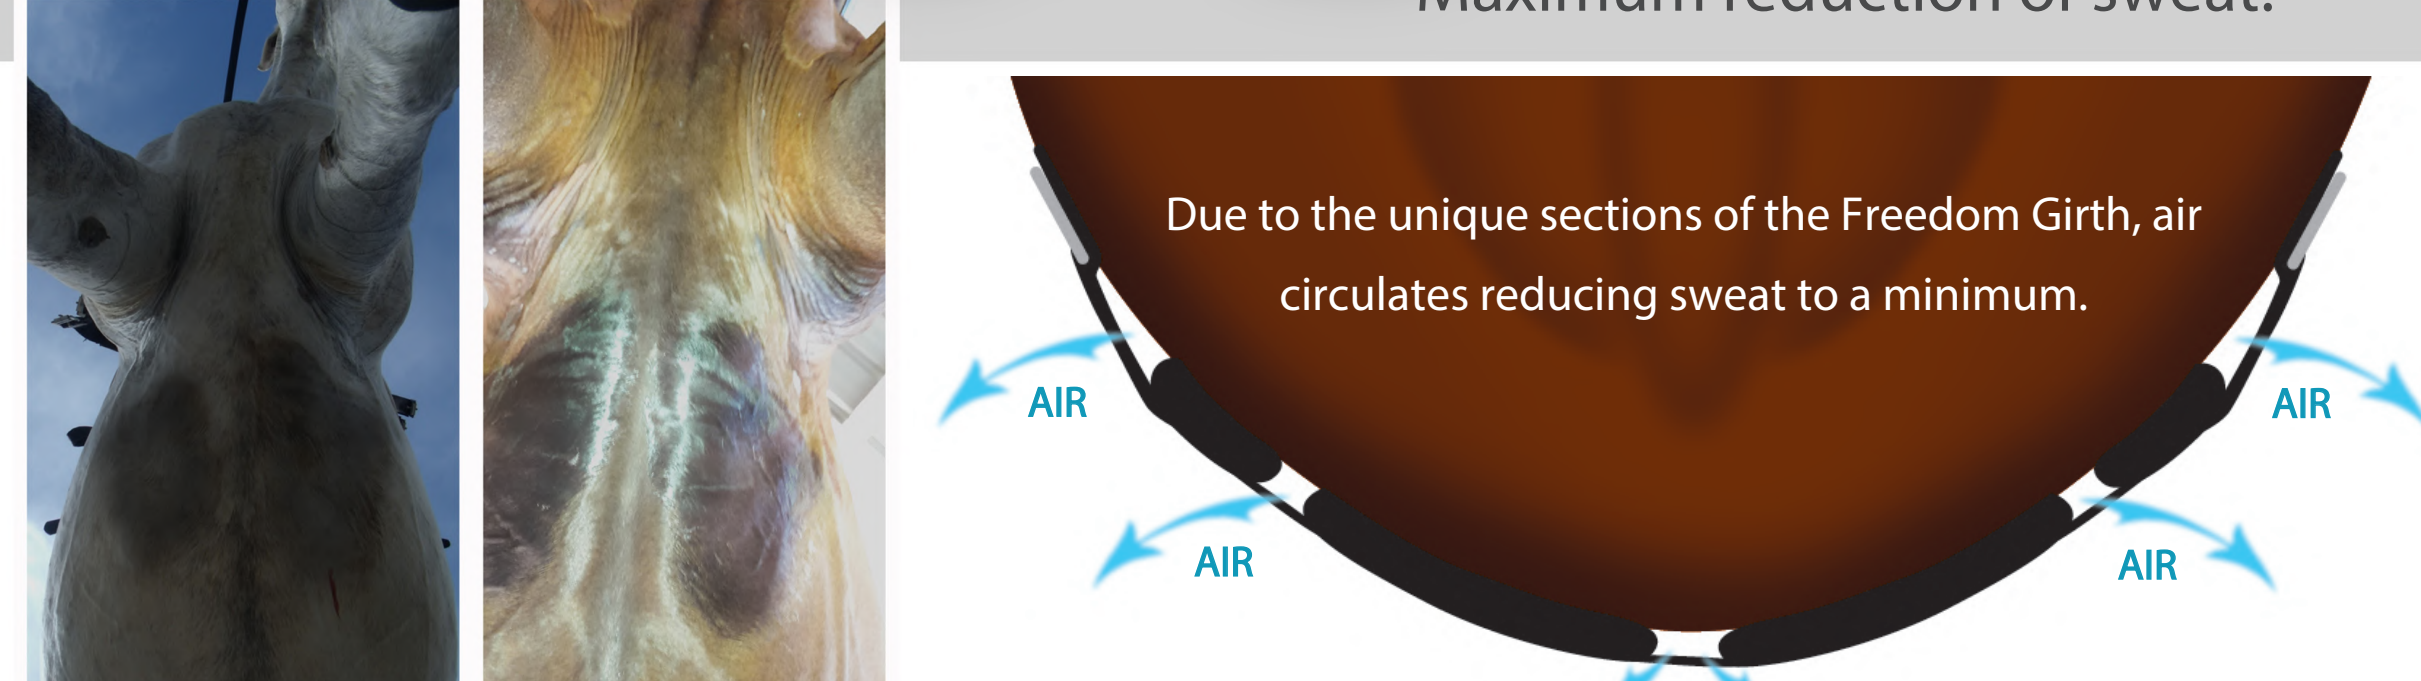

■ The cartilaginous junction of the intercostals facilitates movement.

Maximum air circulation!

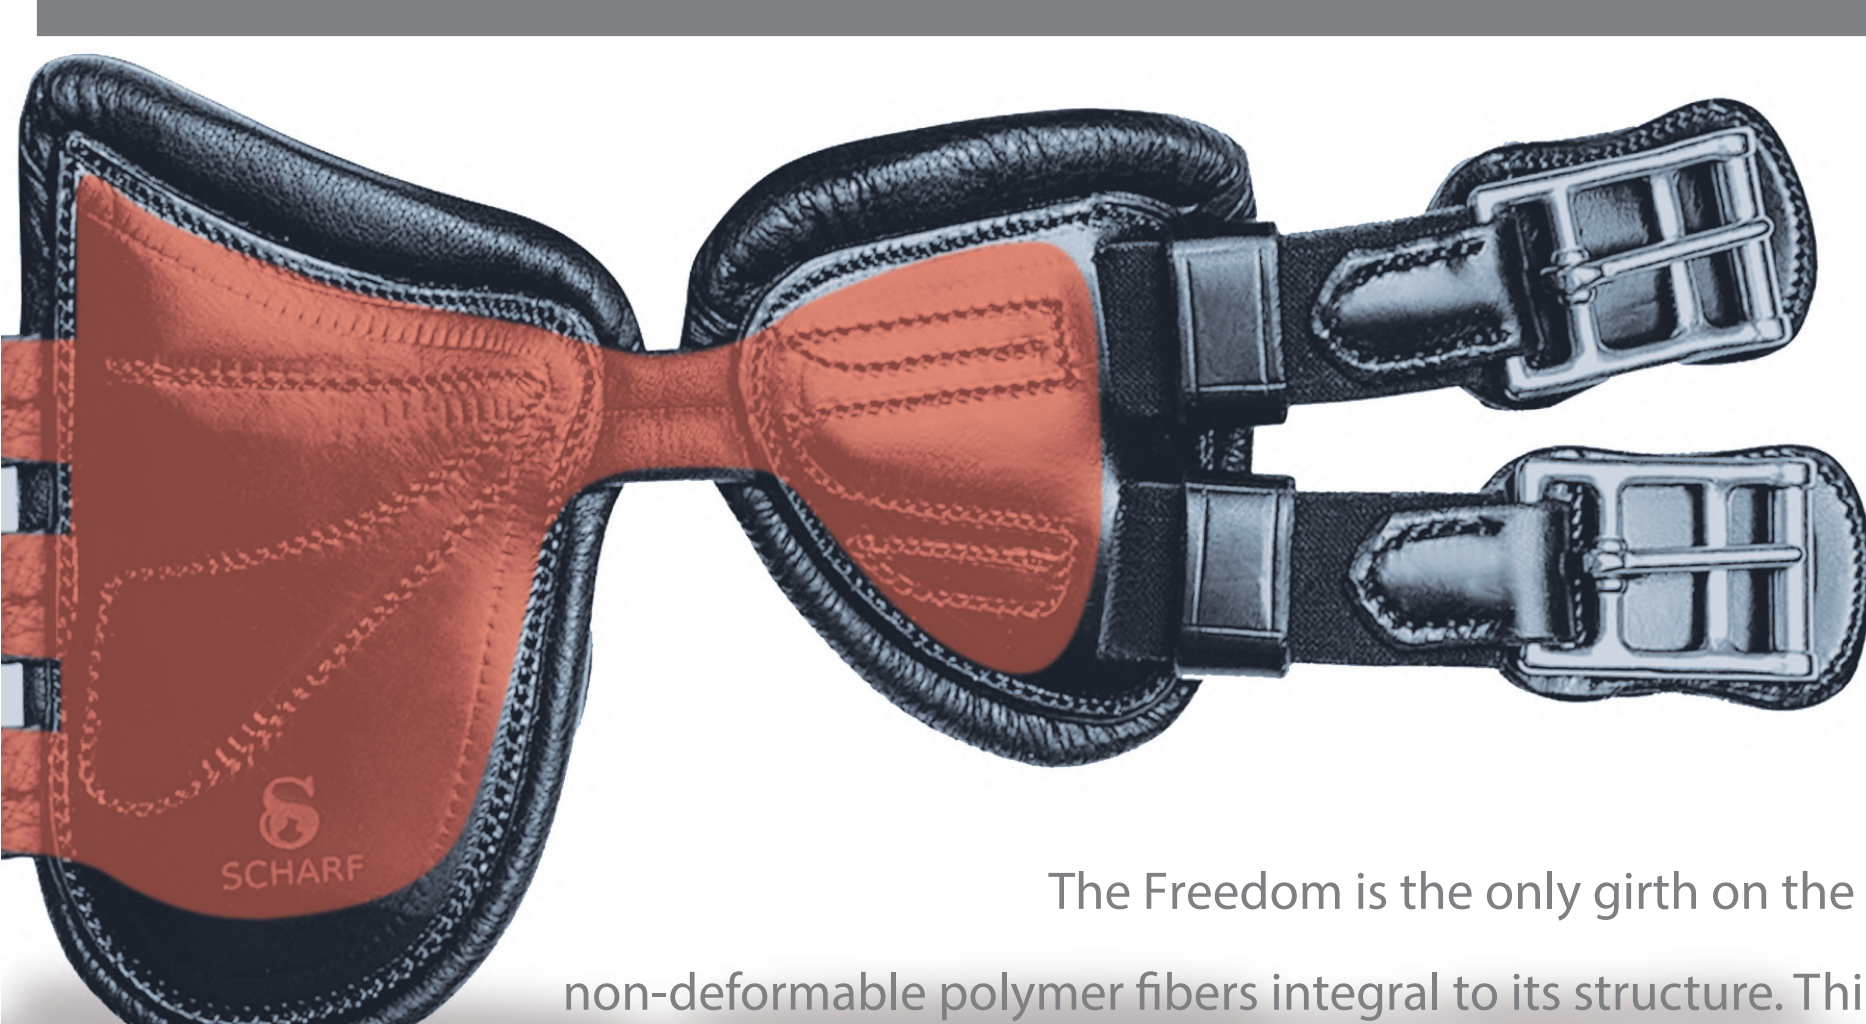

Maximum reduction of sweat!

Sweat marks

STRONG AND RESISTANT

■ Strong synthetic fiber

The Freedom is the only girth on the market manufactured with non-deformable polymer fibers integral to its structure. This material is used within the body of the girth without cuts, making it so strong that it is not possible to break.

The synthetic fibre (tested to 750 ks force resistance in the Dressage model and 1500 ks in the Jumping and Eventing models) run the entire length of the girth covered by premium quality leather for elegance, joining and supporting each of the parts. This material is the latest in its generation, used in extreme sports (climbing, air sport) it is approved by EU Security requirements and has a current Certificate of Inspection.

THE FREEDOM GIRTH, IS UNIQUE !!

The revolutionary concept, makes it the first girth on the market that works in conjunction with a horse's natural muscle movement. Its extreme flexibility makes it capable of folding in on itself, easier to transport and takes up no space!. The Freedom Girth is a unique product, manufactured in Europe using only the highest quality materials in compliance with EU standards. This girth has been produced with the well-being and comfort of the equine as the focal point. Its quality will ensure that

you will have many years of happy usage.
